Medicines Management in Special Schools

**Working together
for outstanding care**

Guideline / Policy on a Page – Summary of Key Points

- This guideline will provide a framework for the safe administration of medication to children and young people within Special School settings, and reflects best practice
- Medication administration in Special Schools is primarily carried out by non-registered staff employed by the Local Education Authority; this guideline outlines strategies for ensuring a clear consistent process for ensuring this is completed with minimal risk to both children and young people receiving medication, and also those administering medication.
- The document guides safe practices within the Special School setting to ensure all medication is appropriately prescribed, supplied, stored and administered to all children who require medication whilst in the care of school staff.
- All medication to be administered to children attending Special Schools should be prescribed by a registered doctor or non-medical registered prescriber.
- If transcription is required, the nurse will have completed transcription training and this will be updated in line with the WHCT Transcribing Policy.
- Medication times should avoid the need for administration at school whenever possible.
- All qualified nurses involved in medication administration will have completed mandatory Medicines Management Training.
- Any staff member who is employed by either the school or WHCT, who is not a registered health care practitioner, will have completed relevant training and competency assessment prior to administering medication. This competency will be renewed annually.
- Schools should obtain written consent from parents/ carers enabling medication to be administered within the school setting (DfE 2015).

Medicines Management in Special Schools

Document Type	Clinical Guideline
Unique Identifier	MED-084
Document Purpose	To provide a framework for safe administration of medicines in the Special School setting
Document Author	Debbie Bolt. Children's Practice Facilitator
Target Audience	Special School Nurses, Student Nurses and Trainee Nursing associates under the supervision of a Registered Nurse
Responsible Group	Medicines Management and Safety Sub Committee/ Clinical Policies Group
Date Ratified	29 th September 2020
Expiry Date	28 th September 2023

The validity of this policy is only assured when viewed via the Worcestershire Health and Care NHS Trust website (hacw.nhs.uk.). If this document is printed into hard copy or saved to another location, its validity must be checked against the unique identifier number on the internet version. The internet version is the definitive version.

If you would like this document in other languages or formats (i.e. large print), please contact the Communications Team on 01905 681770 or by email to WHCNHS.Communications@nhs.net

Version History

Version	Circulation Date	Job Title of Person/Name of Group circulated to	Brief Summary of Change
Guideline review			
1	12.5.20	Team Lead – Special School Nursing	Minor amendments
2	5.6.20	Senior Pharmacist – Medicines Safety	Minor amendments throughout guideline, including; <ul style="list-style-type: none"> • removal of use of fax • second source for transcribing where possible • allergy status prior to every medication administration and include in care plan • tighten parameters for ensuring current prescription used for transcribing • rewording of section regarding school trips (section 7.7) • include fridge and room temperature monitoring • audit use of medicines not transcribed form • Separate section Emergency Adrenaline and O2
3	6.7.20	Interim Head of Education and Clinical Development	No amendments
		Safeguarding Services Manager	No amendments
		Audit, Research and Clinical Effectiveness Manager	No comments received
		Lead for Allied Health Professionals	No amendments
		Chief Pharmacist	No comments received
		Nurse Consultant Infection Prevention	No comments received

		and Control	
		Deputy Head of Quality Governance	Minor amendments, addition to section 10
		All SDU Leads	Minor amendments – Sexual Health Service Lead
		Trust Medical Director	No comments received
		Director of Nursing and Quality	No comments received
		Deputy Directors of Nursing and Therapies	Minor amendments
		All Quality Leads	Quality and Governance Lead, Community Care Quality Team - Integrated Community Services – minor amendments
4	13.8.20	Medicines Management Safety Sub Committee	Amendment to section 7.6
5	29.9.20	Clinical Policies Group	Addition to 5a), to include Nursing Associates
6	29.9.20	Author	Amendments following Clinical Policies Group

Accessibility

Interpreting and Translation services are provided for Worcestershire Health and Care NHS Trust including:

- Face to face interpreting;
- Instant telephone interpreting;
- Document translation; and
- British Sign Language interpreting.

Please refer to the intranet page: <http://nww.hacw.nhs.uk/a-z/services/interpreting-and-translation-services/> for full details of the service, how to book and associated costs.

Training and Development

Worcestershire Health and Care NHS Trust recognises the importance of ensuring that its workforce has every opportunity to access relevant training. The Trust is committed to the provision of training and development opportunities that are in support of service needs and meet responsibilities for the provision of mandatory and statutory training.

All staff employed by the Trust are required to attend the mandatory and statutory training that is relevant to their role and to ensure they meet their own continuous professional development.

Co-production of Health and Care – Statement of Intent

The Trust expects that all healthcare professionals will provide clinical care in line with best practice. In offering and delivering that care, healthcare professionals are expected to respect the individual needs, views and wishes of the patients they care for, and recognise and work with the essential knowledge that patients bring. It is expected that they will work in partnership with patients, agreeing a plan of care that utilises the abilities and resources of patients and that builds upon these strengths. It is important that patients are offered information on the treatment options being proposed in a way that suits their individual needs, and that the health care professional acts as a facilitator to empower patients to make decisions and choices that are right for themselves. It is also important that the healthcare professional recognises and utilises the resources available through colleagues and other organisations that can support patient health.

- Documentation of Medication Not transcribed Form	Page 20

1. Introduction

- a. Children and Young People attending Special Schools require medication administration where it would be detrimental to a pupil's health or school attendance not to do so.
- b. This guideline will provide a framework for the safe administration of medication to children and young people within Special School settings, and reflects best practice.
- c. Medication administration in Special Schools is primarily carried out by non-registered staff employed by the Local Education Authority; this guideline outlines strategies for ensuring a clear consistent process for ensuring this is completed with minimal risk to both children and young people receiving medication, and also those administering medication.
- d. This document should be read in conjunction with Worcestershire Health and Care Trust (WHCT) Medicines Policy - WHCT MED- 095
<http://nww.hacw.nhs.uk/EasySiteWeb/GatewayLink.aspx?alld=111691>
- e. The guideline also incorporates standards expected for 'Supporting pupils at school with medical conditions' (DoE 2015)

2. Purpose of document

The purpose of the document is to guide safe practices within the Special School setting to ensure all medication is appropriately prescribed, supplied, stored and administered to all children who require medication whilst in the care of school staff.

The document makes recommendations to schools in support of best practice in administration of medication by nonregistered health care staff and teaching assistants.

3. Definitions

- a. Children – Children and Young People up to and including 19 years attending Special School.
- b. Special School – differs from mainstream school, in providing education to a concentration of children with identified additional health care needs, which may include learning difficulties, emotional and behavioural difficulties, and physical difficulties, (including children with sensory and/or complex healthcare needs).

4. Scope

- a. This guideline is relevant to any Worcestershire Health and Care Trust (WHCT) employees involved in medication prescribing, supply, storage, administration within a Special School setting.
- b. This guideline also applies to Student Nurses and Trainee Nursing Associates, under the supervision of a Registered Nurse
- c. The guideline supports safe medication administration by both health and education employed staff within the Special School setting. This is achieved by working in partnership to safeguard the wellbeing of all children and young people requiring medication during the school day.

- d. This guideline has been discussed with individual Special School Head Teachers to agree implementation within each school due to the differing needs of each school setting.
- e. Special School sites within Worcestershire are; Chadsgrove School, Fort Royal School, Pitcheroak School, Regency High School, Rigby Hall School, Vale of Evesham School and Wyre Forest School. These sites are managed by the Local Education Authority and not WHCT. However WHCT staff are based in these sites and work within these premises.

5. Training/Competencies

- a. All nurses and nursing associates registered with the Nursing and Midwifery Council (NMC) involved in medication administration will have completed mandatory Medicines Management Training via the Script eLearning package.

<http://hewm3.saferuseofmedicines.org/login>

- b. All nursing staff prescribing medication will have completed and achieved Non-Medical Prescribers (NMP) Qualification relevant training and be a registered nurse prescribers with the Nursing and Midwifery Council (NMC). Non-Medical Prescribers (NMP) will also have registered their qualification with the Trust and complete annual Approval of NMP Competence scope of Practice with the Trust.

- c. If transcription is required, the nurse will have completed transcription training and this will be updated in line with the WHCT Transcribing Policy.

<http://nww.hacw.nhs.uk/EasySiteWeb/GatewayLink.aspx?alld=82279>

If an individual identifies need for more frequent training this will be addressed.

- d. Registered healthcare professionals who delegate medicines administration to a carer (employed by WHCT or other employee) retain the accountability for the delegation, and the responsibility for the training.

- e. Any staff member who is employed by either the school or WHCT, who is not a registered health care practitioner, will have completed relevant training and competency assessment prior to administering medication.

Competency - <http://nww.hacw.nhs.uk/EasySiteWeb/GatewayLink.aspx?alld=98435>

Workbook - <http://nww.hacw.nhs.uk/EasySiteWeb/GatewayLink.aspx?alld=97375>

- f. This competency will be renewed annually; it is the responsibility of the education staff member to seek an update and reassessment when it is due. Reminders will be given to school regarding when annual staff training is due. Records of training and competence will be kept by the Special School Nurse.

- g. The Registered health professional will ensure retraining and competency assessment is available in a timely manner.

6. Responsibilities and duties

- a. The Special School Head and Governing body have responsibility to ensure support for pupils with medical conditions is in place, enabling all pupils remain healthy and achieve their academic potential (DoE 2015).
- b. The Special School Nursing Service Lead will be responsible for ensuring the guidance is safe and reflects best practice.
- c. WHCT nursing staff (registered and non-registered) will be responsible for adhering to the policy and raising any concern or issues that are experienced relating to it.
- d. Agreement should be achieved between the Special School Nurse and the Special School Head Teachers to ensure a training plan and competency assessments can be completed for delegated school staff responsible for administering medication within the school setting. Special School Nurses will provide the school with reminders regarding when annual staff training is due.
- e. School staff should seek an update and reassessment of competency when this is due.

- f. Schools should obtain written consent from parents/carers enabling medication to be administered within the school setting (DoE 2015). Parents/carers should complete 'Parental Agreement to Administer Medication' form (based on DoE guidance) Supporting Pupils with medical conditions templates
https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/349437/Supporting_pupils_with_medical_conditions_-_templates.docx

or similar, for all medication that is to be administered within the school setting. This includes changes to dosages, regular medication and short term courses of treatment.

NB. if the child is the subject of a care order, both the Local Authority and parents ideally, should be approached regarding this.

The Parental Agreement to Administer Medication form must be reviewed by the Special School Nurse whenever there are changes to medication and renewed at least annually, always on admission to school and at the beginning of September. This should be recorded in the child's health records.

- g. Parents/carers are responsible for providing a supply of medicines for use in the school that is appropriate, has a minimum of 6 months left to expiry, unless preparation has a known short shelf life e.g. omeprazole suspension and in the original packaging.
- h. Special School Nurse or school staff, if responsible for administering medicines, are responsible for notifying parents that medications are approaching their expiry dates. This includes emergency medication i.e. adrenaline auto injectors, where expiry dates should also be documented on the outside of emergency box containing the medication, and a reminder written in classroom diaries, to prompt this.

7. Procedure

7.1 Medication prescribing

All medication to be administered to children attending Special Schools should be prescribed by a registered doctor or non-medical registered prescriber.

Evidence of the prescription can be obtained from:

- The dispensing label on the medication packaging, with a current date, and checking it isn't from a previous prescription
- Written letters from GP or Consultant Paediatrician and team, Consultant Psychiatrists
- Discharge letter or summary from hospital
- FP10 prescription Copy of the repeat prescription request (from FP10)
- An emailed prescription or direction from a doctor (this must only be sent and received via an 'nhs.net' email account). School email accounts should not be used.

This information may also be used for transcribing

Evidence of any one of these is sufficient, but more than one source may be used. Where only a labelled product is available, best practice would suggest that an additional source should always be sought, wherever possible.

It is essential that any changes to medication doses are communicated by the prescriber, in writing to Special School Nurses and that Special School Nurses communicate with medical staff and parents/carers to ensure medication can be administered safely as prescribed.

Special School Nurses must obtain written documentation of a prescribed dose change.

A care plan will be available for all children requiring **emergency** medication identifying:

- The child's diagnosis
- Detail of the name of the medication, dose and route, frequency
- Allergy status and type of reaction whenever possible
- Side effects
- Special considerations e.g. dietary needs, pre activity precautions
- Details of emergency parameters and actions

Medication times should avoid the need for administration at school whenever possible.

For example if a medicine is required three times a day, it may be possible to adjust administration times so that doses can be given before school, after school and at bedtime, where this does not conflict with the treatment.

Medication that is required twice daily can usually be administered outside of school times.

Any request to administer daily, twice daily or three times daily medication should be discussed with the Special School Head Teacher, Special School Nurse and Social Care where appropriate to consider the benefits and risks associated with administering any doses at school. This should take place prior to any agreement with parents or professionals.

Medication that needs to be given four times a day, e.g. short term antibiotics, will necessitate at least one dose being given in school.

All prescriptions and care plans should be reviewed at least annually by the Special School Nurse.

All parents should complete a consent form e.g. Parental Agreement to Administer Medication' to allow medication to be administered within school setting (example can be found in Department of Education 'Supporting Pupils with medical conditions templates' (2015)

https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/349437/Supporting_pupils_with_medical_conditions_-_templates.docx

Staff will not give medication unless a consent form is completed. However following discussion with the Special School Nurse, medication that has been brought into school (or came in via school transport with the child) may be administered without consent for the first 24hours, where there is clear prescribing.ie medication packaging is clearly labelled with administration instructions and date that the prescription was issued; this should be within the last 72 hours, i.e. a new current medication This will be assessed on an individual basis, by the Special School Nurse.

All **emergency** medication should be prescribed in the same way with agreed documented care plans giving parameters for each emergency requiring the administration of medication.

7.2 Medication transcribing

Medication should be transcribed onto an approved WHCT medication chart as soon as possible.

All Special School Nurses will complete the transcribing medication training.

All Special School Nurses will be familiar with the Trust Transcribing Policy.

<http://www.hacw.nhs.uk/EasySiteWeb/GatewayLink.aspx?allid=82279>

Non registered health care practitioners i.e. teaching assistants (TA's), school staff and others will not be responsible for transcribing and **MUST NOT** transcribe.

Where a new medication has been provided to school and is required before details can be transcribed to the medication chart:

- Contact the Special School Nurse or Special School Nurse Team Lead for guidance and to inform of need for transcription.
- Confirm with the Special School Nurse or Special School Nurse Team Lead the requirement for medication as received from the parent/carer.
- Confirmation between Special School Nurse or Special School Nurse Team Lead detail on medication label regarding medication name, dose, route, amount and time to be administered
- If the Special School Nurse or Special School Nurse Team Lead advises administration of the medicine, document details of the child/young person; medication given, dose, amount and route including the date and time on the Medication not transcribed form (see Appendix 1).These should be scanned into Carenotes after the medication has been transcribed.
- Special School Nurse or Special School Nurse Team Lead will arrange for transcription as soon as possible.

All medication MUST be transcribed when the Special School Nurse next attends site including emergency medication and as required (prn) medication.

7.3 Medication Storage

All routine medication brought into school must be stored in a locked wall mounted cupboard in the original packaging with the dispensary label intact.

Medication should be segregated according to child, either by storage on a different shelf, drawer or storage box within the drug cupboard/trolley. If there are a large number of named children's medications, they should be stored in a clear logical order e.g. alphabetically or clearly labelled with name or class group in order to minimise risk of administration of the wrong medicine.

Any medication that needs to be stored in a refrigerator should be stored in a locked refrigerator dedicated to medicines storage (i.e. not for food use). Drug 'fridge' temperature must be monitored daily, when there is a Special School Nurse on site, and fridge temperature must remain between 2°C - 8°C.

For additional information see WHCT Drug Fridge Temperature Monitoring Procedure <http://nww.hacw.nhs.uk/EasySiteWeb/GatewayLink.aspx?allid=98658>

The temperature of rooms used for the storage of medication must be monitored. Schools must be notified if rooms used are unsuitable for medication storage, and advised on how this might be remedied, i.e. use of fans, closing window blinds, keeping lights switched off, or advised that an alternative area should be found.

For additional information see WHCT Room temperature Monitoring Procedure <http://nww.hacw.nhs.uk/EasySiteWeb/GatewayLink.aspx?allid=106672>

Only designated staff should have access to the medicines cupboard and medicines refrigerator. This will be the Special School Nurse and designated school staff allocated by the Special School Head Teacher.

Inhalers should be stored in a safe accessible place, they shouldn't be locked away. They must be accessible to the child where the child can manage the inhaler independently, or accessible to the member of staff caring for the child, where the child requires the assistance of another, to manage their inhaler. This must be agreed with school staff and documented in the child's care plan (Asthma UK 2020).

Schools may choose to purchase additional salbutamol inhalers, which are then available to children where their inhaler has expired, runs out, or is not brought into school (DOH 2015)

Spacer devices should be cleaned according to manufacturer's instructions but should always be labelled with child's name to protect from cross infection. They should be stored in a clean dust free environment (closed container or bag).

Original packaging should be intact and must include the child's name, dispensing date, expiry date, instructions for use and dose.

All **emergency** medication should be stored securely, in a locked cupboard but in a location that is readily accessible by appropriate staff.

Controlled Drugs (CD's)

CD's will be stored as all other drugs in school.

All Controlled drugs in school will be recorded in approved WHCT Controlled Drugs Register Patients' Own CD booklets.

Stock checks of CD's in school must be carried out weekly by the Special School Nurse.

Guidance regarding sending CD's out for trips is covered in section 7.6.

7.4 Medication administration

School Nurses and school staff may choose to wear 'Do not disturb: Drug Round in Progress' tabards whilst administering medicines or undertaking training, if desired. This will be dependent upon the individual scenario and child involved; some children may have strong reactions to staff wearing a red tabard, due to behavioural challenges or learning difficulties.

All medication must be checked by the person administering (nurse or school staff) against the drug administration document and the prescription label on the original medication packaging. Prescribed medicines must only be administered in line with the precise directions on the medication chart and dispensing label.

Medication can be checked by a single registered nurse checker. For further information see WHCT Medicines Policy – MED -095

<http://nww.hacw.nhs.uk/EasySiteWeb/GatewayLink.aspx?allid=111691>

School staff should follow their own guidance re checking medicines if they have this.

Allergy status if the child must be checked prior to every medication administration.

The identity of the child **must** be confirmed prior to administration. If administered by a registered nurse it may be necessary to refer to school staff to confirm identity.

When administering a medicine, the school staff members must check:

- The child's name against the medication chart
- The child's name against the name on the dispensing label
- The name of the medicine against the administration chart
- Administration details on the dispensing label match the instructions on the administration chart
- The medication is in date and fit for use.
- That the medication hasn't already been administered

Where a new medication has been provided to school staff and is required before details can be transcribed to the medication chart:

- Contact the Special School Nurse or Special School Nurse Team Lead for guidance and to inform of need for transcription.
- Confirm with the Special School Nurse or Special School Nurse Team Lead the requirement for medication as received from the parent/carer.
- Confirmation between school staff, Special School Nurse or Special School Nurse Team Lead detail on medication label regarding medication name, dose, route, amount and time to be administered

- If the Special School Nurse or Special School Nurse team Lead advises administration of the medicine, document details of the child/young person; medication given, dose, amount and route including the date and time on the Medication Not Transcribed Form (see appendix 1).
- Special School Nurse or Special School Nurse Team Lead will arrange for transcription as soon as possible.

Emergency medicines require the same rigorous checks prior to administration, as any other medicines.

7.5 Non prescribed medication

Special School Nurses do not administer non prescribed medication, nor are they able to support school staff in this administration. School should discuss this with parents and must follow their own policy regarding this.

7.6 Emergency Adrenaline and oxygen

The use of emergency adrenaline is covered by Schedule 19 exemption of Human Medicines Regulation 2012.

Only child specific prescribed oxygen will be administered. Emergency oxygen will be obtained via 999 call.

7.7 Medication administration on school trips

Staff administering medication on a school trip will have completed relevant training and competency assessment.

A copy of the child's care plan and the approved WHCT medication chart should be reviewed prior to the school trip to ensure instructions on the original packaging are correct. Medication expiry date must also be checked prior to leaving school. This will include emergency medication and actions to take in an emergency.

On return from the school trip the medication chart should be completed.

Medication should only be transported in the original packaging with original label containing the child's details and details of the medication.

Where medication is presented in a liquid format the following guidance must be followed;

There may be occasions where the least risk option for liquid medication, is for it to be prepared for administration immediately prior to the trip.

The following will be considered prior to this decision

- Practicality of transporting original container due to increased risk of breakage
- Medication's storage conditions e.g. has to be stored < 25C, reduced risk of taking one dose on a trip, rather than affecting whole container.

- Ease of administering medication to child, as there is a risk when drawing up a single dose of medication that if there are issues e.g. syringe is knocked out of a carer's hand, that there is no further supply of medication available to draw up a further supply.

Liquid medicines may be sent as a drawn up single dose of medication, clearly labelled rather than sending whole bottle of medicine on trip

This is associated with the following risks:

- Incorrect dose being drawn up
- Incorrect instructions on the label.
- Leakage of dose from syringe.

In practice this happens infrequently, but where no other option exists, the above steps must be followed, in order to minimise risk.

- Only Registered Nurses who have completed training in line with the WHCT Transcribing Policy will label syringes of medicine,
- Medication administration box must be scored/completed as follows;
 - Special School Nurse who draws up the dose, will initial the top half of the relevant medication record box, when they measure the dose in the presence of staff member (e.g. Teaching Assistant) who will administer the medication
 - Only oral or enteral (purple) medication syringes must be used to prepare and administer medication via oral or enteral routes
 - Syringe caps will be used to ensure that there is no loss during transport.
 - Special School Nurse will write the label with the name of the child, name of medication, dose, time and route to be given and initial the label
 - Staff member (e.g. Teaching Assistant) checks that instructions on the label are correct, verifies the correct dose has been drawn up and also initials the label
 - The syringe is transferred straight to a medication bag
 - Before administration the staff member rechecks the label and drawn up dosage against the medication administration chart and verifies that both are correct.
 - If correct, they then administer the medication and initials the bottom half of the administration box.
 - If any discrepancies arise then the staff member will contact the Special School Nurse for further advice.
 - The Special School Nurse will then complete an incident report via Ulysses, for any incident involving this process.

Medication should be held in a fastened bag by school staff and not left unattended

When sending CD's out for trips

Ideally an additional pharmacy bottle, correctly labelled with a pharmacy dispensing label, with the child's details and medication details, should be used to transport CD's out on trips, (this reduces the risks associated with taking larger volumes of CD's out of school).

(CD's in liquid form can be transported in the same way as described above if the nurse is available to transcribe labelling)

The stock must be checked out and recorded on the CD record in the presence of the person who will be administering the medication and the transcriber, if transcribing takes place. The drug chart will be signed by the person who administers the medication.

Medication should be stored in a fastened bag by school staff during the trip but returned to safe locked storage within school on return and recorded on the CD record ensuring stock totals are correct; total stock must be physically checked against quantity recorded in the register.

Residential trips

Arrangements and agreement between education staff and parents should be sought prior to the residential trip. Special School Nurses will advise re medication administration for residential trips, but cannot provide additional training or transcribing for this purpose. Where a child is taking part in a residential trip, agreement must take place between the parent and school staff accompanying the trip, as to medicines administration and recording. The Special School Nurse will advise re best practice.

Medication should always be transported in original packaging as stated above.

In the event of medication needing to be left within a residential setting, ideally a locked cupboard should be used for storage or a lockable bag/ case. This lockable device can also be used to store relevant care plans and drug administration documentation. This will reduce risk of medication theft or loss and will protect personal data within labelling and administration charts.

8. Disposal of medicines

Part used, or expired/out of date medicines, will be sent home for parents to dispose of.

Any stock items that are out of date should be returned to Lloyd's pharmacy (contractually agreed to provide a pharmacy service to WHCT) in sealed blue trays/bags, via approved Trust transport where this is available. This will be responsibility of the Special School Nurse.

All medication will be returned home by school staff with the relevant child at the end of each school year.

WHCT Pharmacy Team can be contacted for further advice.

WHCNHS.medicines@nhs.net: 01905 683225

9. Record Keeping

Approved WHCT medication chart and approved WHCT 'Controlled Drugs Register: Patients' Own CD's', must be used to record all medicines administration in Special Schools.

Omissions and refusals must also be recorded on this document. Parents and the prescriber, if appropriate, should also be informed.

Documentation supporting administration of medication in Special Schools should be updated at least annually, usually at the start of the new school year.

NMC and Trust policy on record keeping must be followed (use of pen that can be reliably photocopied, ideally black pen etc.)

10. Monitoring implementation

- a. Monitoring implementation, compliance and effectiveness of this policy will be carried out via observation of practice by the Special School Nursing team. Any incidents relevant to this policy will be recorded via NHS Trust approved incident reporting systems. Lessons learned will be shared across relevant clinical areas. This will be led by the Special School Nurse Team Lead in collaboration with the Special School Head Teacher.
- b. Communication with Special School Head Teachers and parents/carers will be paramount in the event of any drug error or incident affecting children within school.
- c. Use of the audit tool outlined in WHCT Medication Transcribing Policy.
- d. An audit of how often 'Medication is not transcribed forms' are utilised, will be completed by the Special School Nursing Team every 3 years, by looking at records in the Medication tab of Carenotes.
